

## BeRailSafe with GIS

Adding rail GIS to your E-911 CAD system is critical to preparing for a rail incident.

Give this form to your GIS manager and they will be able to integrate railroad tracks, crossings and facilities.

Contact Roger Smock ([rdsmock1@ncdot.gov](mailto:rdsmock1@ncdot.gov)) with questions about GIS capabilities.

### Download NCDOT Rail GIS Layers

1. Go to: <https://connect.ncdot.gov/resources/gis/pages/gis-data-layers.aspx>
2. Scroll down to the bottom-right corner and find the **NCDOT Rail Division Data** section.
3. Download the Track, Crossings, and Facility files in your preferred format.

*\*Files are updated quarterly\**
